

# Team Decals Application Instructions

## required equipment

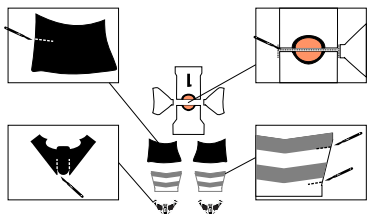

Decal Softeners (Microscale Micro Set and Micro Sol), Tweezers, Craft knife, emery boards, Brush size No 1, scissors. All available to buy at [www.mysubbuteo.com](http://www.mysubbuteo.com)

## prepare the figures

Remove all the mold lines with the craft knife and emery boards. You can paint the figures with satin acrylic varnish to make the decals stick even better

## prepare the decals

Trim each kit off the sheet using a pair of scissors. Use the craft knife to separate the jersey in back, front and sleeves. You can also make small cuts in the shorts, the socks and the shoes to make application of the smaller decal parts easier.

## applying the decals

Wet the decal parts with water and wait until they start to move off the backing paper.

Apply some micro set (blue) directly on the figure.

Carefully lift the decal with the tweezers and place it on the figure.

With a clean brush apply a small amount of Micro Sol (red) over the Decal. When you are happy with the position of the part, continue with the rest of the Decals. When finish, let the figures to dry for at least 2 hours. Seal with a thin coat of matt varnish. Paint the skin parts of the figure and all areas that were not covered by decals with a fine brush and enamel or acrylic colours. Seal with 1-2 coats of matt or satin varnish.
